However blistered the hands of the private mayors and lieutenant governors and ambassadors might be, they seemed to have forgotten their pains and sches in the olmtst small boyish of soldiering. And although they bore their new found military importance they got out of their first wet day meekly, any man of them could have permitted his khaki covered chest to swell a bit and be excused for so do-ing had he heard the very fine things the regular army officer proxies here to teach them were saying of the ag-

Men who at dawn yesterday knew enly that a Springfield was some sort of gun by mid afternoon were lining the company streets drilling perhaps not with regular army precision, but in a fashion that gave their teachers joy.

"They've learned today," said Capt. Gordon Johnston, U. S. A., adjutant of the camp, "what the usual recruits take two or three days to master."

To judge by the forty-five centimetre snores that rolled from end to end of the company streets last night the sheer fatigue, coupled with the fact that the sleeping tents, cots and bedding had been brought here from Philadelphia, all had combined to send the amateur soldiers to the never, never land for the count.

There is only one drawback that threatens to grow serious, none of the war correspondents have yet been able to find a German spy lurking around the camp. The search for one has not been ended, however. His name probably will be August Schoosh, but this detail has not been entirely settled as yet. Schoosh is satisfactory to everyhody, but one group is still holding out for Otto as being preferable to August. At 10 o'clock on the morning of Memorial Day, the plafis of the enemy were no longer shrouded in mystery. The long line of swift superdreadnaughts, fast cruisers, long distance submarines and speedy torpedo craft made a slight change in its course and headed direct for the Island of Manhattan. It became perfectly apparent to the American navy air scouts that the commander of the enemy, fleet knew quite as much about the guns at Forts Wadsworth and Hancock as did the officials of the American War Department. ## WORKHOUSE OF D. C.

In connection with the preparation of the estimates for the fiscal year 1917, inspection of the workhouse at Occo-quan was made today by Commissioner Newman, who also visited the tract ad-joining the workhouse site on which will be erected the new District re-formatory.

An item of \$75,000 for beginning work on the new reformatory was included in the last estimates, but Congress allowed

only \$15,000. A much larger appropriation, it is understood, will be included in the next budget.

Work has begun on the building of a railroad from the reformatory through the workhouse site to Occoquan creek.

To obtain information regarding their needs, Commissioner Newman will visit all of the district's correctional; penal and charatiable institutions. Inspection already has been made of the Industrial Home School and the Home for the Aged and Infirm at Blue

The State Department has sent the answer on the Frye case to Germany and is hopeful it will be the means of bringing about a settlement. Ambassador Gerard has been directed o arrange for the note's simultaneous publication here and in Berlin. Publica-

tion is expected this week. The two governments differ over the question whether the treaty of 1828 with Prussia gives German warships the right to sink American ships carrying contraband on condition that the Ger man government compensate American citizens for losses thus suffered. Ger many insists she has that right. The German government admits her liability in the case of the Frye, and the question now concerns the question of how the treaty is to be interpreted in the matter of right to sink ships carrying contraband.

Take Lime for Tuberculosis In the Journal of the American Medical Association (July 27, 1912, Page 308), Dr. C. F. Disen, of Minneapolls, holds that a "deficiency of calcium" (lime) is responsible for the physical conditions which lead to tuberculosis, "and the therapy he advocates rests on this basis."

One of the reasons for the wide-spread success of Eckman's Alterative in the treatment of tuberculosis is its ability to supply this deficiency. It contains a time sait in such combination with other valuable agents as to be easily assimilated by the average person. Many cases seem to have yielded to it. We have no exaggerated claims for it, but prefer that it be tried on the same basis as any other prescription, and since it contains no oplates, narcotics or habit-forming drugs, it is safe.
